P.O. Box 727  
Hesston, Kansas 67062

Dear Mr. Peters:

Our records indicate you previously notified the U.S. Environmental Protection Agency (EPA) that you are a hazardous waste treatment, storage, and disposal facility (T/S/D) as required by the Resource Conservation and Recovery Act (RCRA). You are reminded that Kansas law and regulations also require such facilities to apply for a state permit. Facilities who submitted their Part A Permit Application to EPA are currently considered to be in compliance with this state requirement.

We are preparing to begin reviewing applications and issuing permits for T/S/D's. In order to proceed with the permitting process, we are requesting an update of your status. Please notify us in writing by June 1, 1982, which of the following applies to you:

1. We are a hazardous waste treatment, storage, or disposal facility as defined by 40 CFR Parts 260 through 265 and will require a T/S/D permit as required by 40 CFR Parts 122 and 124.
2. We are not a hazardous waste treatment, storage, or disposal facility as defined by 40 CFR Parts 260 through 265 and do not require a T/S/D permit as required by 40 CFR Parts 122 and 124. You should indicate in your written response that you wish to have your facility no longer considered a T/S/D and removed from the hazardous waste data management system. Please explain why or what changes you have made so that you are no longer a T/S/D.

If you have any questions, please feel free to contact me. Your cooperation with the hazardous waste management program in Kansas is appreciated.

Sincerely yours,

DIVISION OF ENVIRONMENT
